Digital Animation Engineer

[2018 - 2019] Universidad Panamericana Mexico City
Graphic Simulators Speciality

Work

[2020 - Present] Arrivia, Mexico City

Front-end Developer

- Develop intuitive, performant, maintainable code for a big array of international clients.
- Handle a variety of different languages, frameworks and design softwares such as JavaScript, TypeScript, Vue Js, React, Angular, Adobe Suite, SASS, and Python.
- Lead and development projects with people from different countries.
- I have a deep knowledge and practical skills to create and optimize scalable vector graphics (SVG), allowing an attractive and high quality visual representation in applications and websites.
- I have developed responsive interfaces, ensuring that applications and websites adapt and function smoothly on a wide variety of devices and screen sizes. In addition, I have experience using visualization libraries (ChartJs, D3Js, Animate, BS5, SASS, LESS, etc), which has allowed me to create stunning and effective data visualizations.

[2020] Enapsys, Mexico City

UI/UX Developer

- Project leader of the UI/UX team to achieve objectives based on customer needs.
- Development of prototyping ideas and connection to SAP HYBRIS (LESS, BS5) taking into account a mobile first philosophy.
- Project leader and developer of the MABE brand site for all Latin America.

[2017 - 2019] Torus, Mexico City

Fullstack Developer

- Development of all branding and marketing of the brands managed by the company, as well as the maintenance of each one.
- I developed systems in Javascript and SASS in combination with visualization libraries as well as a back-end environment built on Laravel and others on Wordpress.

[2017 - 2020] Mutuo Financiera, Mexico City

Fullstack Developer

- Management of Mutuo Financiera System (Angular, SASS) (adding content, adapting the design and functionality, user administration).
- Design and implement the user interface for a web application to help employees easily perform their tasks in the area of sales and credit analysis taking into account a responsiveness (Chart JS, SASS and SVG).
- Develop in PHP (Larave, SASS) some important CMB system modules for risk analysis, leads interface, user roles and application for new clients.
- Design and branding all the company image.

[2015 - 2016] IPADE, Mexico City

Web Developer

- Development the front-end (Javascript, SASS) app for an important event.
- Responsible of all graphics and branding.
